

# **Shah India Rubber Products**

An ISO 9001: 2008 Company

## **COMPANY PROFILE**

### **Introduction:**

**Shah India Rubber Products** is a specialist manufacturer of high tech and quality rubber extruded and moulded components like rubber profiles , tubings , curtainwalls , clamp rubber , architectural profiles , gaskets , rubber sheets , rubber expansion joints / bellows, and carrying out rubber lining of vessels / tanks and equipment, thus delivering guaranteed high performance under the most demanding engineering needs.

We excel in materials technology and initial design. Our engineers have expertise in chemical theory, to create innovative and unparallel solutions for our customer requirements in most demanding applications.

With over 50 years of technical expertise, world class production & testing capabilities, and rigorist quality control, we insist on commitment to customer service and producing highly durable and reliable rubber products.

### **About US**

**Shah India Rubber Products** is a very prominent name in the Indian rubber engineering industry, with an industrial excellence of more than 50 years.

The company has over the years specialized itself in the area of manufacture of complex rubber engineering components like rubber expansion bellows , rubber rollers, rubber lining of vessels and tanks and all other kinds of rubber extruded and moulded parts.

Well equipped with the latest machineries, testing equipments, **an in-house** rubber compounding & research facility and backed by a team of experienced workforce, we have the capacity as well as the expertise to manufacture the most complex of Rubber components.

### **Our Goal :**

- ❖ To bring continuous quality improvement process, with total employee involvement, for the mutual benefits of our associates and our customers.
- ❖ We shall always deliver our products and services mindful of our determination to be viewed as superior to our competition.

## Our Products:

We process all rubber polymers like viton, silicon, chloroprene, epdm, sbr, nbr, natural rubber, butyl, nitrile, neoprene & fluorocarbons to manufacture the most hi tech rubber components.

The following is the list of products which we **specialize** in:

1. Rubber extruded profiles, cords, channels, tubes, hoses, curtain wall, clamp rubber, door gaskets , fenders , glazing profiles and architectural profiles etc.
2. Rubber molded items like anti vibration pads , hi temperature withstanding gaskets, metal to rubber bonded parts , engine mountings , pipe caps , manhole gaskets , silicon washers , o rings, oil seals, diaphragms, bushes and many more .
3. Rubber Sheets (electrical / floor mats / industrial gaskets / fatigue mats) etc
4. Silicon Rubber items like mats , cake moulds , transparent tubings , sponge silicon rubber packing profiles , lid covers etc.
5. Rubber expansion Bellows & joints in various shapes and sizes for piping , AC ducting , Air Ductings etc . We also manufacture food grade bellows for pharma and food industries.
6. Rubber Lining by hot / cold bonding method of tanks & vessels (on site / off site)
7. Rubber Lining of Vessels, Tanks , Equipments both on site and at our works for corrosion prevention from all kinds of chemicals , DM water and other applications.
8. Rubberising on Rollers for various conveyor , printing , pickling and other applications

Apart from the above, we specialize in new product development as per customer application and engineering requirements

## **Infrastructure & Capacity :**

### **1) Infrastructure :**

We have 2 fully functional well equipped plant in Mumbai for extrusion and moulding division and a rubber lining and rubber bellows manufacturing group company M/s Industrial Moulders in Baroda which are capable of handling any range and quantum of customer requirements.

### **2) Work Force :**

We believe that our manpower is our most valued investment and take care to nurture them well to make them believe and practice our core values and philosophy.

- Our workforce is a perfect blend of the experienced & young, who are committed and passionate about their work.
- We have in our team few of the finest and the most intellect people of the industry.
- With 24 x 7 onsite technicians, we have the courage and the capability of taking on the most complicated rubber engineering jobs.
- Our employees are fully trained in all aspects of product manufacture, its application , quality assurance, customer profile and site conditions.

### **3) Machine Capability :**

We believe in keeping pace with the time and technology, and it shows in the kind of Machineries we possess, to name a few a fully automatic dispersion Kneader for chemical blending , 2 roll chemical Mixing Mills , 3 roll calander machines , moulding presses of various sizes , rubber extruders of various sizes , tooling and testing equipments etc.

### **4) Test & Research Facilities -**

Materials are tested and certified for production in compliance with our high standards. And a Complete traceability of materials is ensured. All our equipments are maintained and calibrated to the most rigorous standards

- Products are routinely tested using a wide variety of analytical methods and wet chemistry techniques to identify and quantify constituent materials.
- Mechanical/Physical Testing - Our physical testing laboratories perform a complete range of tensile, compression, adhesion, and performance tests to numerous specifications.

**Our Group Clientele :**

We believe in not just making products, but giving solutions to our clients, which is why we are the most preferred choice for our customers. To name a few of our clientele who would vouch for our services,

## **Quality Policy**

Shah India Rubber Products continually monitors its progress towards perfection by measuring key performance indicators including:

- Low customer complaint and return levels
- Zero delivery defects
- High customer satisfaction rating
- Strong delivery performance

Our Quality Assurance Department ensures that all operators are fully trained in the use of latest inspection instruments and techniques. Each operator quality checks their own output prior to passing product for the next stage of production.

All parts are subject to a final quality control inspection to ensure that our customer's total requirements have been met.

We are a company with **ISO 9001: 2008** quality management systems

**“We are committed to providing our customers with 100% conformance to their engineering specifications, with on time delivery, at competitive prices.”**

## **Our Aim is**

**“To be positive and happy & make our customers happy”**

## Contact Us

### Put us to the test

Please contact us with any technical enquiries you may have and our experts will advise on the best solution for your needs.

Hopefully you will give us the opportunity to meet your expectations; we will always do our very best to exceed them.

We pride ourselves in our reliability and commitment to excellence -hopefully you will give us an opportunity to demonstrate this to you.
